Education

Indian Institute of Information Technology (IIIT) Gwalior **Aug 2023 – May 2028**
Integrated Dual Degree in Information Technology | *CGPA: 7.5/10* *Madhya Pradesh, India*

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS

Work Experience

Full Stack Developer Intern **Jul 2026 – Aug 2026**
HiGigAi | *Next.js, TypeScript, Sanity CMS, Cloudinary, Vercel* *Remote*

- Built a multi-tenant school platform, tridentpublicschool.com: **one Next.js deployment** serves **5 branch sites** on subdomains via middleware routing, so a new branch is content entry, not a new build.
- Designed **25+ Sanity schemas**, scoping Studio via Structure Builder so **5 branch admins** manage **15+ page types** for their own branch with zero developer involvement.
- Cut recurring infra cost to **$0/month** by replacing a planned Supabase tier with Sanity-native forms and **Cloudinary** media; **ISR** + webhooks publish edits without redeploys.

Software Developer Intern **Jul 2025 – Sep 2025**
Trionix Technologies | *Next.js, TypeScript, PostgreSQL, Supabase, Firebase* *Remote*

- Built the **VyaparPragati** broadcast admin platform (**6 modules**, **500+ users**) with real-time **Firestore** sync replacing polling.
- Designed bounded per-group message queues (**500** text, **50** image, **20** audio/video) with **FIFO eviction** and read tracking.
- Shipped **Saaro Creations** e-commerce on **PostgreSQL** + **RLS**; removed **N+1 queries**, **halving SSR round-trips**.

Open Source

Kubeflow Organization Member | **Kubeflow & Karmada (CNCF)** | *Go, Python, TypeScript*

- Regular contributor with **8 PRs merged** across **Kubeflow** and **Karmada**, including input validation in **kubeflow/mcp-server** (#236, #237) and TypeScript fixes in **karmada-io/dashboard** (#700, #702).
- In **kubeflow/trainer #3960**, fixed a bug that **permanently stuck** TrainJobs after runtime edits: admission read live runtime state while reconciliation used the per-job snapshot.

Projects

CIDRA – CI Debugging & Repair Agent | *Python, LangGraph, Docker, FastAPI* | PyPI | Live | GitHub **Sep 2026 – Present**

- Built an agent that automatically fixes failing **GitHub Actions** builds and only opens a PR after proving the fix works: **94.3%** verified fix rate vs **15.6%** for a naive log-to-LLM approach across **45** CI failures.
- **18-node LangGraph** pipeline with **SBFL (Ochiai)** fault localization (**100%** vs **57.8%** top-1), **AST**-audited patches and **red-to-green** checks in a network-isolated **Docker** sandbox; **89%** fewer tokens, rejected all **48** cheating patches.

MCP Zero-Trust Security Gateway | *Python, FastAPI, Docker, seccomp-bpf, Landlock* | PyPI | GitHub **May 2026 – Jun 2026**

- Built a security gateway that sandboxes the tools AI agents call (**MCP** servers), so each tool can only do what it declared: **84.6%** runtime defence, **100%** containment, **87.8%** on **MCPTox** (**583 rows**).
- Compiles **strace**-verified capability grants into per-tool **seccomp-bpf** filters (**declare–verify–confine**), with **provenance gating** and per-call **manifest re-attestation** closing **CVE-2025-54136**.

Trinetra – Parking Enforcement Intelligence | *Python, FastAPI, XGBoost, H3, Next.js* | Live | GitHub **Jul 2026**

- Predicts where illegal parking will cause congestion in Bengaluru a week ahead so police can plan patrols: **0.80 Precision@10** across **53 police stations**; **Top 5%**, **Flipkart Gridlock 2.0**.
- Clustered **112K** violations into **1,196 H3 hotspots** with a 0–100 risk score; **XGBoost** forecasts with **SHAP**-explained ranks and greedy patrol routing surfaced a **5.5%** afternoon enforcement gap.

Technical Skills

Languages: C++, Python, Go, JavaScript, TypeScript, SQL
Web Development: Next.js, Node.js, FastAPI, REST API, Sanity CMS
AI/ML: XGBoost, SHAP, RAG, LangChain, LangGraph, HuggingFace Transformers
Databases, Cloud & Tools: PostgreSQL, Supabase, Firebase, SQLite, Git, Docker, Linux, Vercel, Cloudinary, Figma

Achievements & Leadership

- Solved **1,000+ DSA problems** (**Code360** 2x Monthly Topper, **LeetCode** rating **1724**, **GFG**); **Top 2%**, JEE Mains 2023.
- **Leadership: Tech Lead, Hindi Samiti Club** & Robotics Team lead, **Infotsav** (**Blazing Wheels** Runner-Up); **Internshala Student Partner** and member, **Student Gyan Movement**, IIIT Gwalior.
